PROJECTS

- **Tick Tac Toe Game**
 - Developed a **console-based Tic Tac Toe game using C++**, implementing core programming concepts such as **arrays, functions, conditional logic, and loops**. The game supports two-player interaction with real-time input validation, dynamic board updates, and win/draw condition detection, demonstrating strong problem-solving and logical programming skills.
- **College Event Management System**
 - Designed and developed a **College Event Management System** using **React.js, Node.js, Express.js, and MongoDB**, delivering a seamless, responsive user experience for organizing, publishing, and managing college events.
 - Engineered a robust backend with **RESTful APIs**, secure authentication, and optimized database operations to support real-time event registrations, data integrity, and scalable system growth.
- **Hospital Appointment Management System**
 - Built a **Hospital Appointment Management System** using **Core Java, Java Swing , and MySQL** , enabling patients to book appointments and doctors/admins to manage schedules and records efficiently.
 - Implemented **role based control, CRUD operations** and **JDBC connectivity**, with a clean, professional Swing UI for secure and data handling.
- **Hackathon Partner Finder (CollabX)**
 - Developed a Hackathon Partner Finder platform using **Vite** for **front-end development**, leveraging basic configuration and core features.
 - Built backend services with **Node.js** and **Express.js**, participated in **Google Hacksprint 2K25**, and managed the complete project on **GitHub** with proper version control and documentation.

TECHNICAL SKILLS

- **Languages:** C, C++, Java, Python, PL/SQL, MySQL
- **Tools:** Autodesk, Jupiter Notebook, LaTeX, VS Code, GitHub, VMware
- **Web:** HTML, CSS, JavaScript, NodeJS, ExpressJS, ReactJS

CODING PROFILES

- **LeetCode** : Solved 250+ problems to build consistency in logic development, basic algorithms, and coding practice.
- **CodeChef** : Achieved 2 star and 1400+ rating, reflecting regular practice and participation in coding contests.

EXTRA-CURRICULAR ACHIEVEMENTS/ACTIVITIES

- **Class Representative** — Led 70+ students and organized events with 30 percent high engagement.
- Completed **Microsoft Excel and Power BI Global Certifications** with hands-on experience in data analysis, visualization, and dashboard creation.
- Participated in **Google Hacksprint 2K25**, contributing to ideation, frontend development, and backend API integration.

SUMMARY

- Passionate Computer Science student with hands-on project experience in C++ and web development, driven by curiosity and continuous learning and experience in real-world academic projects.
