

V JAYA SAI KRISHNA

Software Engineering Intern · Full-Stack Developer · B.Tech CSE (GPA 8.78/10)
vjayasai3@gmail.com • +91-9030649777 • linkedin.com/in/jay4ignite • github.com/JAY4IGNITE

SUMMARY

Computer Science undergraduate (GPA 8.78/10) with hands-on experience shipping full-stack web applications using React.js, Node.js, and MongoDB, including REST API design, JWT-secured backends, and AI integrations. Solved 250+ LeetCode problems and placed 2nd among 160 teams at ProjectSpace 8.0. Looking to contribute to scalable, real-world engineering projects and continue growing as a full-stack developer.

TECHNICAL SKILLS

Languages:	C, C++, Java, Python, JavaScript, SQL, PL/SQL
Frontend:	React.js, Vite, HTML5, CSS3, Responsive UI Design
Backend:	Node.js, Express.js, FastAPI, REST API Design, JWT Auth, OAuth 2.0
Databases:	MongoDB, MySQL, PostgreSQL (Supabase), JDBC
Concepts:	DSA, OOP, RBAC, CRUD, Agile/SDLC, Chrome Extension Dev
Tools:	Git, GitHub, VS Code, Postman, Jupyter Notebook

PROJECTS

SmartApply — AI-Powered Job Application Platform

React · FastAPI · MongoDB · NVIDIA NIM (Llama 3)

- Architected a full-stack platform automating job applications via a custom Chrome Extension for LinkedIn, reducing manual effort by ~70% and handling multi-user concurrent sessions securely.
- Integrated NVIDIA NIM (Llama 3) for real-time ATS resume scoring and personalised cover letter generation; implemented JWT authentication with encrypted data storage.
- Awarded 2nd place at ProjectSpace 8.0 among 160 competing teams.

CollabX — Hackathon Partner Finder

React 19 · Node.js · Express.js · Supabase (PostgreSQL)

- Built a role-based collaboration platform (3+ user types) for discovering hackathons, forming teams, and managing join requests with Google OAuth 2.0 + JWT security.
- Designed a normalised PostgreSQL schema on Supabase, supporting complex team permissions and cloud media uploads; contributed as lead backend developer at Google Hacksprint 2K25.

College Event Management System

React.js · Node.js · Express.js · MongoDB

- Delivered a production-grade event platform serving 500+ users with registration, category filtering, real-time admin dashboard, and slot/capacity management with duplicate-prevention logic.
- Engineered a RESTful API backend with JWT auth and role-based access (student/admin); optimized MongoDB indexes achieving sub-200ms average response times under concurrent load.

Hospital Appointment Management System

Core Java · Java Swing · MySQL · JDBC

- Architected a 3-role desktop system (patient, doctor, admin) for booking, schedule management, and doctor availability tracking; implemented RBAC, appointment history, and status tracking.
- Designed a normalised MySQL schema with relational integrity constraints via JDBC, reducing manual scheduling effort by ~60%.

EDUCATION

B.Tech, Computer Science & Engineering — Aditya University, Andhra Pradesh

2024 – Present

Cumulative GPA: 8.78 / 10.0

ACHIEVEMENTS & ACTIVITIES

- ProjectSpace 8.0 — 2nd place among 160 teams for SmartApply, an AI-powered job application platform.
- Google Hacksprint 2K25 — Cross-functional team; owned frontend development and backend API integration end-to-end.
- LeetCode — 250+ problems solved across arrays, trees, graphs, DP; consistent daily practice.
- CodeChef — 2-star (1400+); participated in division-level competitive programming contests.
- Class Representative — Led coordination for 70+ students; organised 5+ events with 30% above-average engagement.
- Certifications: Microsoft Excel — Global Certification · Microsoft Power BI — Global Certification (data analysis, visualization, dashboard creation).
